DETAILED ACTION

Allowable Subject Matter

1. Claims 11-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant has claimed uniquely distinct combination of features in the instant invention. The combination includes "detecting a critical vehicle condition by the control unit by evaluating the data of the sensors and the control units; generating a list of possible actions for the motor vehicle driver in response to the critical vehicle condition detected in the detecting step; displaying the detected critical vehicle condition and the list of possible actions of the motor vehicle driver on a display unit of the input and output unit; and executing an action selected by the motor vehicle driver using the control unit". The closest prior art, Sekine et al. (US 5,963,148) and Kojima (US 5,694,116). Sekine et al. disclose road situation perceiving system, and Kojima discloses driver condition-monitoring apparatus for automotive vehicles. The references, either singularly or in combination, fail to anticipate or render the above limitations obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion.
